Summary

Full Stack Developer with 2+ years of experience building modern web applications using React.js, Laravel. Worked on e-commerce platforms, SaaS products, admin dashboards, and business websites with focus on clean UI, responsive design, and smooth backend functionality. Comfortable working on both frontend and backend development including API integration, authentication systems, state management, and performance improvements.

Projects

1. LetsShop — Enterprise Multi-Vendor E-commerce Platform

Tech Stack: React.js, Tailwind CSS, Redux Toolkit, Laravel 11, MySQL

- » Built a multi-vendor e-commerce platform supporting 7 user roles, allowing distributors to manage products while customers handle carts, secure checkout, and complete order tracking
- » Developed 35+ REST APIs using Laravel 11 for OTP-based authentication, product management, commission systems, wallet management, and dual-currency support (INR & AED) using Laravel Sanctum
- » Created interactive admin dashboards and customer storefronts using React.js, Redux Toolkit, React Router, Framer Motion, and React Hot Toast notifications
- » Improved application performance using server-side pagination, advanced filtering, lazy loading, optimized state management, role-based route protection, and efficient frontend rendering techniques

2. Business Websites Development

Tech Stack: HTML, CSS, JavaScript, Bootstrap

- » Developed responsive business websites with clean UI design and mobile-friendly layouts
- » Built landing pages, reusable sections, forms, and interactive UI components using HTML, CSS, JavaScript, and Bootstrap
- » Live projects: [Red Fresh Bharat](#) | [IR International Pvt Ltd](#) | Naba Al Masarat United | [Elite World Pro](#) | [Tawfiq Careers](#)

Technical Skills

- » **Programming Languages:** JavaScript (ES6+), HTML5, CSS3
- » **Backend Development:** Laravel ,MVC, REST API Development
- » **Authentication & Security:** JWT, OAuth 2.0, Google Sign-In, Apple Sign-In, Role-Based Access Control (RBAC), Input Validation
- » **Frontend Development:** React.js, Tailwind CSS, Bootstrap
- » **Databases:** MySQL
- » **Tools & Development:** Git, GitHub, Postman, VS Code, Chrome DevTools ,Vercel

»»» Experience

1. Full Stack Developer

JMD Technology Solutions

Sep 2025 – Present
(Remote) Chicago, Illinois, USA

- » Developed and maintained HRMS and financial trading applications using **React.js, Laravel** with a strong focus on frontend development
- » Developed interactive trading application interfaces with dynamic dashboards, transaction screens, portfolio views, watchlists, tables, filters, search, pagination, and real-time data displays
- » Built secure authentication systems using Laravel Sanctum, JWT, and OAuth along with role-based access control and protected application routes
- » Implemented real-time notifications and live updates using WebSockets to improve dashboard interactions and user communication
- » Developed advanced frontend and backend features including pagination, filtering, search functionality, form validations, lazy loading, and SweetAlert-based user notifications
- » Performed API integration, debugging, and production issue fixing using Postman, browser console, network inspection tools, and Chrome DevTools

2. Associate Software Developer

7Croe Technologies

Aug 2024 – Sep 2025
(Onsite) Hubli, India

- » Worked on full-stack web applications including finance systems, e-commerce platforms, course management systems, school management software, HRMS platforms, and civil construction management applications using React.js, Laravel
- » Built 5+ production-level business web applications using React.js and Laravel, along with 10+ responsive websites using HTML, CSS, JavaScript, and Bootstrap
- » Built secure authentication systems using Laravel Sanctum, JWT, and OAuth along with role-based access control and protected application routes
- » Implemented real-time notifications and live updates using WebSockets to improve dashboard interactions and user communication
- » Developed advanced frontend and backend features including pagination, filtering, search functionality, form validations, lazy loading, and SweetAlert-based user notifications
- » Performed API integration, debugging, and production issue fixing using Postman, browser console, network inspection tools, and Chrome DevTools

»»» Education

» Bachelor Of Engineering(BE), Electrical and Electronics

AGMR College Of Engineering(VTU) - 7.21cgpa

2021 - 2025

»»» Achievements & Certifications

- » Java and Data Structures Certification — Apna College
- » Full Stack Development Course Certification — Apna College
- » MERN Stack Bootcamp Certification — 30Days Coding
